From: Robert A. Pages
Subject: Ed Scott, RJR

I received a call today from the above individual.

His first question was had I been notified that he would
To make a long story short, Griscom was supposed to have t
PM about this....

1) Who is this guy? 2) What does he want?

1) He said he was "Compliance Director for RJR." In answer t
mean, he mentioned things like facilities management, envirc
safety, etc. He sounded like someone who might have the resp
both Dave Merrill and Stu Pouliot in Richmond (plus some othe
is currently active on what he kept referring to as the "tech
ETS/IAQ." As near as I can figure "technical side" means engi
and ventilation. He referred to the RJR smoking lounge work: "We did the
engineering side of this." He also mentioned the two guys that Mayada met
at ASHRAE: Howard Toft and Stephen Curl.

2) What he wants is to get together with some PM folks to review/discuss
what the two companies are doing/planning on IAQ. What is PM telling
building owners and managers, etc., to help them cope with the ETS issue?
He also mentioned that RJR had sent Toft on a month-long trip to visit
25 A&E firms to try to learn how they are dealing with smoking (lounges,
break rooms, banning, etc.)

The way it was left with him is that I needed to talk to some PM folks
and that I would get back to him.

This is obviously related to the message that Mayada received from Toft
and Curl which she brought up at the staff meeting last Friday. If we
are to pursue this who should do it and when? The who may be very
important because of the perceived differences in approach to this
issue by RJR and PM. We have tended to handle it pretty much as a
corp affairs issue, while RJR has always seemed to be more technical/
scientific in their approach (i.e., they seem to have many scientists and,
perhaps now, engineers who seem to work pretty much full-time in ETS-
related matters).
